

Connected Business Network

Vision

Traditional invoicing software treats every business as an isolated entity.

Zentry Business connects suppliers and customers into a secure business network where business documents flow automatically between connected organizations.

The Problem

Today, the workflow looks like this:

Supplier creates invoice

↓

Print PDF

↓

Send through WhatsApp

↓

Customer downloads PDF

↓

Customer manually enters the purchase

↓

Customer updates inventory

↓

Customer stores the invoice

This process is repetitive, slow, and prone to errors.

The Solution

When two businesses are connected on Zentry Business, transactions become digital.

Supplier creates an invoice.

↓

Customer receives a notification instantly.

↓

Customer reviews the invoice.

↓

Customer accepts it.

↓

Purchase entry is created automatically.

↓

Inventory is updated automatically.

↓

Outstanding balance is updated.

↓

Both businesses now have synchronized records.

No manual data entry.

No duplicate work.

No PDF uploads.

No typing mistakes.

Business Connection

Each business has its own unique Business ID.

Example

Business Name

ABC Hardware

Business ID

ABC-20481

A supplier searches using:

- Business Name
- GST Number
- Mobile Number
- Business ID

The customer receives a connection request.

Once approved,

Both businesses become connected.

Connected Features

Purchase Sync

Supplier creates invoice.

Customer instantly receives:

- Purchase Bill
- Products
- Quantities
- GST
- Prices

One click.

Purchase recorded.

Invoice Sync

Both businesses have:

- Same invoice number (supplier reference)

- Same products
- Same tax
- Same totals

No mismatched records.

Inventory Sync

Supplier

Stock decreases.

Customer

Stock increases.

Automatically after acceptance.

Payment Sync

Supplier

Pending ₹25,000

Customer

Payable ₹25,000

Both dashboards show identical outstanding balances.

Delivery Tracking

Supplier marks:

Packed

↓

Dispatched

↓

Out for Delivery

↓

Delivered

Customer sees real-time updates.

Order Requests

Customer needs products.

Instead of calling...

Customer clicks

"Request Products"

Supplier receives:

- Requested items
- Quantity
- Notes

Supplier converts directly into an invoice.

Purchase Orders

Customer creates Purchase Order.

↓

Supplier receives it.

↓

Reviews.

↓

Accepts.

↓

Converts to Invoice.

Everything remains linked.

Product Catalogue Sharing

Supplier publishes products.

Connected customers browse:

- Products
- Prices
- Stock availability
- Offers
- Images

One click.

Create Purchase Order.

Shared Documents

Both businesses can access:

- Invoice
- Purchase Bill
- Delivery Challan
- Credit Note
- Debit Note

No file sharing required.

Smart Notifications

Supplier created Invoice

Customer notified instantly.

Supplier received payment

Customer ledger updated.

Goods dispatched

Customer notified.

Invoice overdue

Both parties receive reminders.

Security

Nothing is shared without permission.

Business owners choose:

- Who can connect
- What can be shared
- Which employees have access

All connections require mutual approval.

Businesses can disconnect at any time.

Future Ideas

AI Purchase Suggestions

Customer stock becomes low.

AI suggests:

"ABC Hardware usually supplies this product."

One click.

Generate Purchase Order.

AI Supplier Recommendation

Need a product?

Search across connected suppliers.

Compare:

- Price
- Delivery Time
- Ratings

Choose the best supplier.

Business Reputation Score

Businesses earn trust based on:

- Payment history
- Delivery reliability
- Customer ratings
- Order completion

This helps businesses choose reliable partners.

Long-Term Vision

Zentry Business is not just an invoicing application.

It becomes a connected ecosystem where suppliers, wholesalers, distributors, retailers, and customers collaborate digitally.

Instead of exchanging PDFs, spreadsheets, and WhatsApp messages, businesses exchange structured data in real time.

The result is faster operations, fewer errors, and a seamless supply chain powered by trusted business connections.
