Product Vision & Core Modules

Version: 1.0

Status: Product Vision Document

Author: Prabhu

Product Type: SaaS Business Management Platform

Vision

Build the simplest and smartest Business Management Platform for small and medium businesses.

The goal is to replace Excel sheets, notebooks, WhatsApp records, and multiple disconnected applications with one unified platform.

Invoices are only the starting point—the application should become the operating system for running a business.

Mission

Help businesses spend less time managing paperwork and more time growing their business.

Target Customers

Initially focus on businesses that generate invoices every day.

Examples:

- Hardware Stores
 - Electrical Shops
 - Mobile Shops
 - Medical Stores
 - Furniture Shops
 - Textile Shops
 - Auto Spare Parts
 - Grocery Wholesalers
 - Construction Material Suppliers
 - Small Manufacturers
 - Retail Shops
-

Product Goals

- Extremely easy to use
 - Modern UI
 - Fast invoice creation
 - Powerful inventory management
 - Complete business reports
 - Cloud based
 - Multi-user
 - AI powered
 - Affordable monthly subscription
-

Product Philosophy

Every feature should save time.

Every screen should answer a business question.

Every workflow should require the fewest possible clicks.

Core Modules

1. Dashboard

The dashboard gives the owner a complete business overview.

Features

- Today's Sales
 - Today's Profit
 - Monthly Revenue
 - Monthly Expenses
 - Outstanding Payments
 - Pending Receivables
 - Recent Invoices
 - Recent Purchases
 - Low Stock Alerts
 - Top Customers
 - Best Selling Products
 - Revenue Graph
 - Expense Graph
 - Cash Flow Summary
-

2. Customer Management

Manage every customer in one place.

Customer Details

- Customer Name
- Company Name
- Mobile Number
- Email
- GST Number
- Billing Address
- Shipping Address
- Credit Limit
- Outstanding Balance
- Customer Notes

Customer Features

- Purchase History
 - Invoice History
 - Payment History
 - Credit Tracking
 - Customer Ledger
 - WhatsApp Invoice
 - Email Invoice
 - Quick Call
 - Favorite Customers
-

3. Supplier Management

Store supplier information.

Supplier Details

- Company Name
- Contact Person
- Mobile
- Email
- GST Number
- Address

Features

- Purchase History
- Outstanding Amount
- Supplier Ledger

- Payment History
 - Frequently Purchased Products
-

4. Product Management

Central place to manage products.

Product Information

- Product Name
- SKU
- Barcode
- Category
- Brand
- Unit
- Purchase Price
- Selling Price
- GST Percentage
- HSN Code
- Images

Inventory Information

- Current Stock
- Minimum Stock
- Maximum Stock
- Warehouse Location

Optional Features

- Product Variants
 - Batch Number
 - Expiry Date
 - Serial Number
-

5. Inventory Management

Automatic inventory tracking.

Features

- Stock In
- Stock Out
- Stock Adjustment
- Damaged Stock
- Returned Stock

- Warehouse Transfer

Alerts

- Low Stock
 - Out of Stock
 - Overstock
 - Expiring Products
-

6. Sales & Invoicing

Fast invoice creation.

Features

- GST Invoice
- Tax Invoice
- Estimate
- Proforma Invoice
- Delivery Challan
- Sales Return
- Credit Note
- Debit Note

Payment Methods

- Cash
 - UPI
 - Card
 - Bank Transfer
 - Credit Sale
-

7. Quotations

Create quotations before sales.

Features

- Professional Templates
 - Expiry Date
 - Discount Support
 - GST Support
 - Convert to Invoice
 - Email Quote
 - WhatsApp Quote
-

8. Purchase Management

Manage purchases from suppliers.

Features

- Purchase Order
- Purchase Entry
- Supplier Invoice
- Purchase Return
- Payment Tracking

Automatically updates inventory.

9. Expense Management

Track business expenses.

Categories

- Rent
- Salary
- Electricity
- Fuel
- Internet
- Office Expenses
- Transport
- Miscellaneous

Features

- Expense Categories
 - Expense Reports
 - Monthly Comparison
 - Expense Analytics
-

10. Payment Management

Manage all incoming and outgoing payments.

Incoming

- Customer Payments
- Partial Payments
- Advance Payments

Outgoing

- Supplier Payments
- Expenses
- Refunds

Tracking

- Due Payments
 - Overdue Payments
 - Payment Reminders
-

11. Reports & Analytics

Generate business insights.

Sales Reports

- Daily
- Weekly
- Monthly
- Yearly

Financial Reports

- Profit & Loss
- Cash Flow
- Revenue
- Expenses

Customer Reports

- Customer Ledger
- Outstanding
- Purchase History

Inventory Reports

- Stock Report
- Low Stock
- Dead Stock
- Fast Moving Products

Purchase Reports

- Purchase Summary
- Supplier Report

12. Invoice Designer

Customize invoice appearance.

Features

- Upload Logo
- Theme Color
- Multiple Templates
- QR Code
- Signature

- Footer
 - Terms & Conditions
 - Bank Details
-

13. GST Management

India-specific taxation support.

Features

- CGST
 - SGST
 - IGST
 - GST Summary
 - HSN Codes
 - Tax Reports
 - GST Ready Invoices
-

14. Notifications

Automatic business reminders.

Alerts

- Payment Due
 - Low Stock
 - New Purchase
 - Invoice Paid
 - Overdue Invoice
 - Daily Sales Summary
 - Monthly Report
-

15. Employee Management

Manage employees.

Features

- Employee Profile
- Roles
- Permissions
- Attendance
- Salary Records

16. User Roles & Permissions

Secure access control.

Roles

- Super Admin
- Owner
- Manager
- Accountant
- Cashier
- Sales Executive
- Warehouse Staff

Each role can have custom permissions.

AI Features (Premium)

These features will differentiate the platform from traditional business software.

AI Bill Scanner

Upload a supplier invoice.

AI automatically extracts:

- Supplier Name
- Invoice Number
- Products
- Quantity
- Price
- GST
- Total Amount

Creates a purchase entry automatically.

AI Invoice Generator

Example:

Create an invoice for Kumar with 25 cement bags and 10 steel rods.

AI prepares the invoice instantly.

AI Business Assistant

Owners can ask:

- Why are sales down?
 - Which products earn the highest profit?
 - Which customers haven't purchased recently?
 - What products should I reorder?
 - Which supplier offers the best pricing?
-

AI WhatsApp Assistant

Customers send messages like:

Need 20 bags of cement tomorrow.

AI prepares a quotation or draft invoice for approval.

Future Modules

These are planned after the core platform is stable.

- CRM
 - Point of Sale (POS)
 - Loyalty Program
 - Multi-Warehouse
 - Manufacturing
 - Service Management
 - Barcode Printing
 - Label Printing
 - Vendor Portal
 - Customer Portal
 - Delivery Management
 - WhatsApp Ordering
 - API Marketplace
 - Third-party Integrations
-

Non-Functional Requirements

Performance

- Fast page loads
- Optimized database queries

- Offline-ready architecture (future)
- Responsive UI

Security

- Role-based access
- Secure authentication
- Data encryption
- Audit logs

Scalability

- Multi-tenant architecture
- Subscription-based SaaS
- Cloud hosted
- Modular architecture

Technology Stack

Frontend

- Next.js
- React
- TypeScript
- Tailwind CSS
- shadcn/ui

Backend

- Supabase
- PostgreSQL
- Supabase Auth
- Supabase Storage
- Edge Functions

Infrastructure

- Vercel
 - Cloudflare CDN
 - Razorpay
 - Resend
 - AI Integration
-

MVP Scope (Version 1)

The first version should include only the essentials:

- Dashboard
- Customers
- Suppliers
- Products
- Inventory
- Sales
- Invoicing
- Purchases
- Expenses
- Payments
- Reports
- Invoice Templates
- GST Support
- Authentication
- Roles & Permissions

This provides a complete business management solution while keeping the initial release achievable.

Long-Term Vision

The long-term goal is to evolve from an invoicing application into an intelligent Business Operating System.

The platform should become the single place where business owners manage sales, purchases, inventory, finance, employees, analytics, and AI-powered business decisions—helping them run their entire business efficiently from one modern application.
